

OBSTETRICS & GYNECOLOGY

EMPOWERING WOMEN THROUGH EVERY STAGE

OB/GYN care provides women with early detection and treatment of cervical and breast cancers, support during pregnancy, and more.

WELL-WOMAN CARE

Primary Care

Integrated healthcare services for general health and wellness needs.

PAP Screens

A routine procedure to screen for cervical cancer or precancerous cells.

Mammograms

An X-ray of the breast to detect breast cancer early.

Cervical Screenings

A procedure to check for the human papillomavirus (HPV) or precancerous cell changes on the cervix.

Contraception

Also known as birth control, includes methods or devices to prevent pregnancy such as the pill and IUDs.

PREGNANCY CARE

Prenatal Care

Regular checkups during pregnancy.

Postnatal Care

Care that begins immediately after birth and continues for up to six weeks after birth.

Perinatal Care

Care that covers the entire period from becoming pregnant until about one year after giving birth.

Delivering Hospitals

Sinai Health & Advocate Trinity

WOMEN, INFANTS & CHILDREN PROGRAM

The WIC program provides women and children (up to age 5) who are at nutritional risk with supplemental foods, education and breastfeeding support. You may become eligible at pregnancy.
